CAMI is a custom manufacturer of Amphibious Vehicles. We specialize in designing and creating original built amphibious vehicles. The gratification is taking the invention from an idea to production, completion, and then introduction it into commercial or recreational markets.

Our amphibious vehicles posses the patented safety feature of being unsinkable thus making us unique.

Usages of CAMI's amphibious vehicles manufactured through the last 20 years are: Sightseeing, Search and Rescue, Firefighting, Ambulatory, Cargo Supply, Transportation, Taxi, Tourism, Recreation, Speed, Fuel Conservation, and for FUN!

Hydra-Terra Amphibious Tour Bus

The Hydra-Terra's provide land and water tours, as well as, transportation for various locations around the world. The depth, nor time out on the water matters to the Hydra-Terra, as long as fuel and care are provided.

Treated with proper care, the Hydra-Terra was designed to run for years and years in salt or fresh water.

Universal designs allows the installation of instrument packages in virtually any language and local units of measure. CAMI is able to install nearly any brand of engine and power train allowing for serviceability in respective country. The Hydra-Terra's meet global emission and we conform to each countries standards.

CAMI conforms to the stringent rules of the following authorities including, but not limited to: ABS, DOT, EU, MCA, NHTSA, NTSB, SAE, & USCG; as well as the rules and regulations for each respective country in which CAMI's vehicles are operating.

"Thank you for your proactive action regarding amphibious vessel safety. The Safety Board commends your leadership in the recreational amphibious vessel industry."- Marion C. Blakey, Chairman NTSB (National Transportation Safety Board), July 8, 2002

Hydra-Terra Amphibious Tour Bus

The Hydra-Terra is a United States Coast Guard fully inspected vessel for domestic USA vessels. It passes all of the following USCG inspections and/or tests: Structural Hull Analysis, Hull Welding Examination, (including die penetrate testing), Electrical Systems Approval, Sea Trial, Complete Stability Test, And Certificate of Inspection.

The Hydra-Terra is unsinkable!

CAMI specializes in foam filled unsinkable amphibious vehicles. This flotation foam is approved by USCG and it's usage is included in our Patent.

Lengths

40ft/12.2meters

30ft/9.15meters

Height

11'6"/3.5meters

Width

8'6"/2.5 Meters

Weights

49 Passenger & 2 Crew

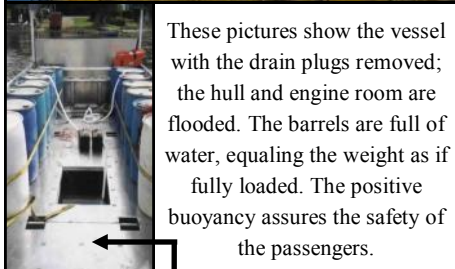

Empty 19,000 Pounds

Loaded 28,000 Pounds

32 Passenger & 2 Crew

Empty 17,000 Pounds

Loaded 23,000 Pounds

These pictures show the vessel with the drain plugs removed; the hull and engine room are flooded. The barrels are full of water, equaling the weight as if fully loaded. The positive buoyancy assures the safety of the passengers.

A ZF Marine Transmission drives a huge 26" bronze propeller on a 2" stainless steel shaft. Steering is provided using an electric linear actuator to move the rudder port and starboard, no cables. A rudder angle indicator is located on the dash. 2 or 3 engines optional.

Terra Wind Amphibious Motor Coach-The Land, The Lake, The Luxury, & The Fun!

The Terra Wind is a beautiful, first class motor coach that doubles as a yacht. It can drive on the highway at speeds up to 80 mph. While on the water it can cruise at speeds up to 7 knots.

The Terra Wind was designed and created to have the outward appearance of a luxurious motor coach. It is not until the two (2) 19" bronze propellers are seen on the back of the vehicle that one realizes it is also a yacht.
